Office Action Summary

Application No. 09/966,608

Applicant(s)

Braun And Sutton

Examiner

Laurie Scheiner

Art Unit 1648

	The M	MAILING DATE of this communication appears of	on the cov	er sheet	with the cor	respondenc address				
	for Reply									
		D STATUTORY PERIOD FOR REPLY IS SET	TO EXPIR	E3	MON.	TH(S) FROM				
THE MAILING DATE OF THIS COMMUNICATION Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the										
mailing date of this communication. If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).

Art Unit: 1648

Claims 26-56 are pending in this application.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 26-56 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The newly recited phrase "said portion encoding at least 3 amino acids of SEQ ID NO:2" renders the claims indefinite since there is no limitation requiring that the 3 amino acids are contiguous. As such, the claim reads on any portion of the nucleic acid molecule as represented by SEQ ID NO:1 which encodes at least any three amino acids, provided that each specific amino acid is set forth by SEQ ID NO:2. Moreover, it is not possible to determine which nucleic acid molecule is intended since, for example, in the case of claim 26, the nucleic acid molecule may be from 9 contiguous nucleotides to 301 contiguous nucleotides. One cannot determine what is claimed, due to indefiniteness, since neither the length nor the sequence of nucleic acid molecule can be determined.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 1648

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 26-56 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over EMBL Online 1 November 1996 (1996-11-01) "Similar to a B. Subtilis Gene (GB: Bachemehy 50, " Accession number Q59306 (Meyer, J.).

Meyer teaches the EcoR1-Sau3A fragment of Clostridium pasteurianum genomic DNA encoding a 190 amino acid sequence. The reference is silent with respect to the sequence of the DNA. Rather, the DNA is represented by the amino acid sequence (encoded gene). Thus, it is unclear which specific codons of the reference encode the five contiguous amino acids (HFKSK) which share 100% identity with five contiguous amino acid residues of instant SEQ ID NO:2. It is asserted, therefore, that the codons which encode HFKSK of the reference are the identical corresponding (with respect to translation) codons of SEQ ID NO:1. The degeneracy of the genetic code perfectly exemplifies the functional equivalency of all codons which encode the same single amino acid. Thus, in the absence of evidence to the contrary, all possible degenerate sequence variations resulting in the expression of HFKSK are obvious in view of the amino acid sequence of Meyer. It is further emphasized that instant claims 29-41 and 44-56 are rejected because the specific amino acid residues recited by the respective

claims are set forth by the reference, irrespective of sequence, since no "contiguous", or similar, limitation has been set forth.

Applicant's arguments with respect to claims 26-56 have been considered but are most in view of the new ground(s) of rejection.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Laurie Scheiner, whose telephone number is (703) 308-1122. Due to a flexible work schedule, the examiner's hours typically vary each day. However, the examiner can normally be reached Monday thru Friday. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James Housel, can be reached on (703) 308-4027. Any inquiry of a general nature or

Art Unit: 1648

relating to the status of this application should be directed to the Group 1600 receptionist whose telephone number is (703) 308-0196.

Correspondence related to this application may be submitted to Group 1600 by facsimile transmission. The faxing of such papers must conform with the notice published in the Official Gazette, 1096 OG 30 (November 15, 1989). Official communications should be directed toward one of the following Group 1600 fax numbers: (703) 308-4242, (703) 305-3014, (703) 872-9306 or (703) 872-9307. Informal communications may be submitted directly to the Examiner through the following fax number: (703) 746-5226.
